

If you can sign on to the Sharp Open Enrollment site but cannot access anything once you are on the page you may need to make their site a “trusted web site”

This example using Microsoft Explorer . Open up (*click on*) the browser/web.

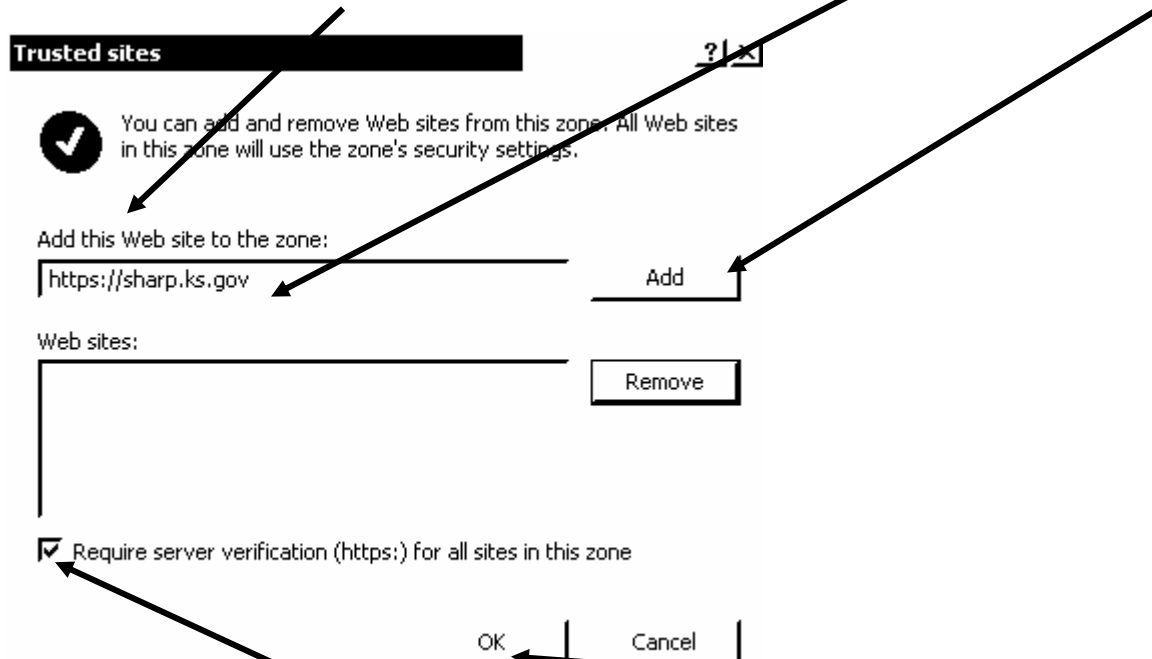

A) On the top toolbar click on *Tools* and select *Internet Options*.

B) Under Internet Options, click on the *Security* tab and then select *Trusted Sites* and click on *Sites* button.

C) In the field below *Add this Web site to the zone:* - type in *https://sharp.ks.gov* and click *Add*

D) Check on the *Require server verification (https)* for all sites in this zone and then select *OK*. You are done!
